WORK EXPERIENCE

Series - Software Engineer Intern

Remote

Nov 2024 - Current

- Built user-facing endpoints with Node.js and Firebase, achieving 99.9%.
- Designed and tested new features to improve user workflows, increasing end-user productivity.
- Collaborated in Agile teams using GitHub and Notion, reducing project delivery time by 20%.
- Used OpenAI to extract information from transcripts, generating relevant tags for user profiles.

Headstarter AI - Software Engineer Intern

Remote

July 2024 - October 2024

- Used OpenAI to generate responses for user inputs and created functions using Javascript.
- Styled the front end using Next.js, HTML, and CSS.
- Collaborated with a team of 3 developers using GitHub, agile methodologies, and CI/CD.
- Gained experience with Firebase, Stripe, Pinecone, ShadCN, and component libraries.

SKILLS

- Languages: JavaScript, Ruby, HTML, CSS, Node.js, SQL
- Tools: React, Redux, AWS, Twilio, RoR, Stripe, OpenAI, Vercel, Github, Postman, Firebase

PROJECTS

ProfScore - Full Stack Engineer

- Used React, Next.js, Node.js, OpenAI, Firebase, and Pinecone for full-stack development.
- Filtered professor data with Node.js and optimized retrieval using Pinecone, achieving 95% accuracy.
- Designed reviews and rating features with React and Next.js for an interactive experience.
- Styled the front end with Next.js and CSS, creating responsive desktop layouts.

Calmify - Full Stack Engineer

- Used React, Material-UI, Next.js, OpenAI, Firebase, and Stripe for full-stack development.
- Implemented swipe functionality with Next.js for flashcards, enhancing user interaction.
- Integrated OpenAI to improve prompt accuracy, reducing errors by 10%.
- Optimized database queries with Firebase, reducing latency by 20% and boosting performance by 15%.

Amazeon - Full Stack Engineer

- Used React, Redux, Ruby on Rails, AWS, HTML, and CSS for full-stack development.
- Built a dynamic UI with React and Redux for real-time state updates, improving user interaction speed by 50%.
- Implemented lazy loading and server-side rendering, reducing page load times.
- Developed RESTful APIs with Ruby on Rails for product management, order processing, and user authentication.

Bonjour World - Full Stack Engineer

- Used MERN stack, AWS, Google Maps API, and Google Translate API for full-stack development.
- Styled the landing page, enhancing visual appeal and improving user engagement by 20%.
- Developed backend functionality to cycle through different languages, increasing accessibility by 30%.
- Contributed to the MERN stack project, collaborating on frontend and backend components.

EDUCATION

App Academy - Certification Of Completion

Aug 2023 - Dec 2023

New York, New York

CUNY College of Staten Island - Associates Degree, CompSci

Jun 2020 - May 2022

New York, New York

- Data Structures And Algorithms, Object Oriented Programming, Discrete Math
